Nominations:

Futurities on request

Comments:

Sire of Sires UVM Springfield is an extraordinary outcross for the majority of today's Morgan mares. One of the few remaining stallions within thirteen generations of Justin Morgan, UVM Springfield has an unquestionable pedigree composed of delicately interwoven strains of Morgan royalty including 38 crosses to Artemesia. Closer up, he carries crosses to the Topaz daughters Inez and Fairytop, to Vigilda Burkland, and to Norma. He is free of the Nocturne, Starfire, Noble Flaire, Serenity, and Black River families, as well as Lost River Sanfield. These bloodlines make him suitable for the majority of American Morgan mares, and help explain why he has been so successful in improving his mares when crossed to the Noble Command and In Command branches of the Nocturne family. UVM Springfield also carries UVM Watchman and UVM Flash, suggesting that Man About Town LPS, Arboria Noble Victor, and Futurity French Command mares should work well.
