

New foals & mares at Greentree Ranch

*Cece Green continues
40-year legacy
started by her parents
at Colorado ranch.*

*Top: Greentree Brigadier
Bottom: Greentree Nightowl*

Greentree Ranch, Loveland, CO continues as one of the oldest breeding farms in the United States. Started in 1962 by the late Bill and Louise Green, the ranch is now owned and operated by their daughter Cece Green-Yelek, her husband Dave Yelek, and her daughter Katie. They continue to meet the goal set so many years ago: to produce good, sound and healthy Morgan horses.

Greentree had wonderful four foals in 2004. From GTR Earls Raven is a graceful, agile, lovely black filly, Greentree Princess Ali; from Hartland Valeda, a smashing black colt with four white socks, star and snip, Greentree Ulysses; from Moondrift Prelude, a showy, fun-filled bay filly, Greentree Introduction. The fourth, out of a Quarter Horse/Appaloosa mare, is a black colt with a blanket, two hind socks and a snip, Greentree Alexander. Six mares are bred for 2005 and new horses, as always, have arrived at the ranch.

The broodmare band continues to swell: Greentree Firelight, already in foal (Applevale Encore x Bonita Graham, our foundation mare); Coal Creek Jane (Teton Royal Raven x Coal Creek Bay Bee, both by Wyoming Flyhawk); Lady Futurity (Charlestown Scotland x Encore's Elegance), in foal to Brigadier. This varied group of mares will continue to prove the strength of the genes behind the Greentree breeding program.

The training program continues forward. In addition to working with young horses and getting them started right in harness and under saddle, Dave and Cece are riding horses around cattle. They are successful marketing these concepts with new horses coming in month after month.

The clinics, "Train Your Horse To Drive, I & II," continues to be popular. Contact Cece for available dates and check the website for details.

As always, Greentree will be breeding mares. The senior stallion Greentree Brigadier's book again will be limited this year and they are offering his son, Greentree General (Greentree Brigadier x Greentree Nightengal), to the public for the first time. General's first foal is due this year.

Greentree always has horses for sale.

"I am incredibly proud of the stock my family has bred," Cece says. "We are extremely selective in our breeding choices, continually evaluating and gelding. I believe there is no room in our breed for below standard horses."

Please feel free to give Greentree a call or stop in. They love to show off their horses and with some warning can take you on a drive or ride around the countryside there.
